Value Based Decision Making Augmented with Intuition
= Successful Leadership!

Leadership is not all cut and dry, black or white, good or bad.

This session will help you identify ways to value both side of yourself - your intellect and your gut. We'll explore together a leadership style that will help set you apart on campus and in your future careers.

- Examine leadership styles from past to present, including logic, intuition, observation and experience.
- Learn how to transform decisions from traditional binary platform (using one skill at a time) to continuum action, (working in tandem with each other).
- Learn how to connect and cultivate your inner self-talk and feelings, your inner positive dialog.
- Know the difference between intuition and judgement, what you might be projecting onto others, how to bypass your personal bias and trust your inner cues to make a more balanced, unbiased decision.
- Barriers to Success explores societal norms, connective pressure, intuitive narcissism

True powerful leaders that perfected the art of using Head-Heart-Insight Leadership are able to create compassionate team cooperation, and foster holistic solutions and decisions.

Affect change through BOLD decisions for yourself and the team.
